THE MOWING INDUSTRY WILL NEVER BE THE SAME

SPARTAN ADVANTAGE

Whether you're a commercial cutter or weekend warrior, we believe Spartan Mowers offers the highest quality machines, pound for pound and dollar for dollar on the planet.

Robert & Becky Foster
Creator/Owner

“WHAT STARTED AS A DREAM

was built with dedication and one goal in mind, to set a new standard for the mowing industry. Robert Foster, creator of the Spartan Mower and successful entrepreneur, has had a passion for mowers ever since he was a young boy. Over the years, that passion has developed into one of the fastest growing mower companies in history. The importance of every detail is evident from its ergonomic design to the quality of the cut. The machine not only looks good, but it handles like a dream. It's built with heavy duty American Steel and is manufactured at our headquarters located in Batesville, Arkansas. We believe you will be blown away by the commercial grade features offering performance and durability at an incredible value.

For the past five years, we've been relentlessly pursuing the perfect machine. To be honest, it hasn't been easy. We've had to learn from our mistakes and continually improve. Our rapid growth has given us the opportunity to expand our facility. And now we are able to build the mower we've always wanted. I'm excited to show the world **ALL** the **Spartan Advantages** that set us apart from and above the competition.

TAKE THE SPARTAN CHALLENGE

Take this list of Spartan Advantages and compare our mower to your favorite brand. Let's see how they stack up. Can they offer as many advantages at the same low price? Don't forget to compare the comfort and smooth ride.

We Know You'll Be Impressed

REAR RADIAL TIRES

It all starts with traction. Exclusive Radial Tires for better traction and softer ride are on all RZ-Pro models and up. Challenge our ride against others out there and you'll feel it for yourself.

**RZ Base model not included. RT-HD and above come standard with front radials.*

HD FUSION WELDED FRAMES

Our frames on all RT and SRT models are constructed from the same tubing as our frames on our 65 MPH Intimidator UTVs. Spartan Mowers are built tough, there's no doubt about it!

7 GAUGE STEEL DECKS

Starting with our 2020 models, all Spartan Mowers have a deck fabricated from 7 gauge steel, not just the top end models. Check out the competition and see the difference for yourself. No light duty decks here!

RECEIVER HITCH

All RT and SRT models come equipped with a built-in 2" receiver hitch. Just think about all the possibilities.

VIBRATION CONTROLLED DECK

Vibration controlled deck system with a one-piece idler pulley and shock absorber takes away belt whip and "soft start electronic control" means it pulses electricity to the electric clutch to grab gradually helping reduce startup squeal. It's not just smoother; it increases your belt and clutch life.

KEY PAD

Our key pad allows you to personalize your code to start the mower. It also has a push button switch for accessories like lights, electric chute, etc. The screen shows engine hours, PTO drive hours, when to change your oil and light indicators for diagnostics. It's your mower's personal assistant!

**Standard on ALL Models*

HYDRAULIC DRIVE

All models from RZ-HD and up have Parker Hydraulic drives (no gear reduction) for smoother, trouble-free operation. That's up to 25% more efficient than gear reduction hydros. Who doesn't love being more efficient?!

FOLDED ROPS

ROPS (Roll Over Protection) on all RT and SRT 2020 models for operator protection. Fold down to clear enclosed trailers.

TUFF-TORQ

Our RZ and RZ-Pro models with Tuff-Torq have added charge pumps and steel gears for more power and reliability.

CHARGE PUMPS ON EVERY MODEL

Precharge pumps on every model for 2020 makes every hydrostatic drive smoother for precision control by eliminating pump cavitation.

PARKING BRAKE PEDALS

Foot controlled on and off parking brake so both hands can be on control sticks. Another great feature that helps keep you in control. Test drive and see what you think for yourself.

**Standard on ALL Models*

HILLSIDE / TRACTION

Spartan Mowers has engineered superior technology that combines perfect balance with superb incline control for a smoother, safer ride. Take it on an incline and feel the difference!

**Industry standard does not recommend mowing on inclines over 15 degrees.*

SPRING SUSPENSION

SRT models have rear traction enhancing custom Winimac spring suspension for better grip and smoother ride. It allows radial tires to follow every little undulation in the riding surface. In other words, the springs allow the wheels to follow the contour of the turf.

ADJUSTABLE SEAT ON SRT MODELS

Exclusive Spartan Mower seats offer supreme comfort for an 'all day ride.' A 3" adjustable seat made with Dymetrol® material, coupled with adjustable TecnPaks® elastomers under the seat platform offers a ride that's above industry standard. We don't compromise on comfort.

FOUR AG BEARINGS

All RT-HD and above models have four ag bearings in each spindle along with a 1/4" shaft for rock solid blade stability and longer life.

STRESS PADS

Stress relief pads are standard on all XD models and available as an accessory for the entire line. For those of you who mow hours at a time, try our stress pads out for yourself. Your shoulders and neck will thank you! Did we mention we don't compromise on comfort?!

BROAD BEAM LED LIGHT

Customized Spartan LED headlights are standard on XD and available plug and play for all models. Mounted directly to the front of the mower, it's great for finishing your last three rows at dusk and lighting your way into your trailer or shed.

U.S.A.

Did you know that we are manufactured in the USA, with US made steel, engines, hydro drives, custom seats, control panel, idler, pullies... the list goes on.

CHANGE-ON-THE-GO

RZ-HD, RT, and SRT deck height adjustments may be made on-the-go by depressing shock assisted pedal, dialing numbered level, and releasing pedal.

12V OUTLET

Not only a place for your phone, but a way to charge it or to power other 12V items.
**RZ models - storage pocket not included*

ADJUSTABLE ARMS

Adjustable steering arms come standard on RT-HD and SRT models and can be installed on all models.

ENHANCED XTF DECK SYSTEM

Xtreme Turf Flow (XTF) decks have been redesigned and enhanced to meet the spring, summer, and fall mowing conditions everywhere. This enhanced deck system comes standard on **ALL models**.

EZ DEBRIS REMOVAL

Belt covers are open around the perimeter to permit EZ blowing out of accumulated debris to help keep your machine cleaner after use.
**Standard on ALL Models*

2020 VANGUARD® QUIET RIDE EXHAUST

RT-HD, SRT-HD, and SRT-XD have a new Quiet Ride high-end insulated exhaust system. Check these out on all Big Block Vanguard® models.

SOLID ANTI-SCALP WHEELS

Most competitive anti-scalp wheels are hollow (like an egg shell). Spartan's are solid and greasable.

HIGH QUALITY PARTS

The same mower pulleys, idlers, shock controls, soft start key pads, belts, spindle bearings, and many other parts used on \$10,000 full commercial models are also used all the way down to the lowest priced residential Spartan models. This includes our sturdy 7 gauge steel decks!

**Standard on ALL Models*

ANTI-SLIP MAT

All models are equipped with a rubber anti-slip foot mat. These mats help reduce vibration from the transmission to the operator's foot.
**Standard on ALL Models*

RESILIENT BUSHINGS

Special resilient bushings on the mower stabilizing arms reduce the shock and damage to the mower if it hits curbs, stumps, or other debris.

**Standard on ALL Models*

DESIGN & STYLE

Our passion for muscle cars from the late 60's has fueled the design of the Spartan Mowers. The wide tires and sleek style give it an image all its own.

RUGGED POWER AND HIGH OPERATING EFFICIENCY

The heart of the HT Series Integrated Hydrostatic Transmission is the world class Parker Torqmotor married to a high performance Parker variable displacement pump. Parker Torqmotors and pumps have earned a worldwide reputation as a gold standard in hydraulic power transmission. Parker drive systems have been propelling the turf industry since the introduction of zero turn radius mowers, demonstrating market leading durability and efficiency. Laboratory tests show the HT Series transmissions achieve up to a 25% efficiency gain over competing power systems. Spartan's partnership with Parker has been crucial to our success in offering a more efficient machine.

MORE POWER TO THE DECK

More Power to the Deck

Better overall efficiency means more horsepower to the deck. This translates to a fast, high quality cut, whether the turf is easy or tough, or the terrain is flat or hilly.

But, if it's your money you're spending on fuel, you should strongly consider the potential fuel savings that come with a machine powered by Parker's HT Series Transmission.

HT Series Transmissions provide more power to the deck for faster, high quality cuts in tough terrain. The HT Series puts more torque and more power on the ground. HT Series Transmissions need less energy to propel a machine, leaving more power for work.

NO GEAR BOX

Gearboxes rob power from the machine and are a source of fluid contamination. Eliminating the gearbox means:

- Higher starting torque
- Higher efficiency
- Smooth, quiet operation
- Fewer internal moving parts
- No gear wear or debris in hydraulic fluid

Lab tests suggest 25% fuel savings over comparable competitive power systems. Parker fuel consumption lab tests of two identical machines, one with HT Series transmissions, the other a stock machine with a competitive drive system, revealed that the HT Series outfitted machine ran 25% longer under the same loading conditions. Of course, in real life in the grass, experience will vary.

**When used with approved hydraulic fluid.*

High operating efficiency pays off with less heat and more power available to do work. Less heat into the fluid means a cooler running transmission, which extends fluid life. When using Parker engineered hydraulic fluid in the HT Series, the fluid change interval can be as long as 1000 hours*, significantly greater than the competition. Direct porting between the pump and motor yields greatly enhanced operating efficiency. Cooler operating design means less heat into the hydraulic oil, which translates into less maintenance and lower downtime.

Wasted Energy = Heat

Higher efficiency means lower fluid temperature and cooler operation.

SMART RIDE TECHNOLOGY – 5 LAYERS OF COMFORT

Front and Rear Radial Tires

Maximum traction while also providing a softer and smoother ride with its construction. Allows lower air pressure to be used.

Rear Suspension with Springs

Custom Winamac Coil Springs allow up and down deflection and slight side-to-side movement of tire tread to increase traction while also providing a softer ride by allowing the rear traction tire to follow the contour of the turf.

TecPak® Under Seat are Adjustable for Weight

TecPak® under the seat are easily adjustable for 100-300lb operator weight to provide a smoother ride. This highly engineered elastomeric product absorbs more energy per unit of weight and volume than other models.

360 Degree Seat Plate to Damper Shock From All Directions

Three neoprene mounting points absorb shock from 360 degrees.

Ultra-Premium Dymetrol® Adjustable 3" Travel Seat

Dial on front of seat is easily adjustable for operator's weight. The high performance Dymetrol® fabric works like a spring and is comfortable, light weight, and durable.

VANGUARD®

MANY CONTRACTORS CAN NOW MOW ALL YEAR ON ONE OIL CHANGE

Driving ahead of the industry once again is Spartan Mowers with their revolutionary Vanguard® Oil Guard technology. Increasing oil change intervals from 100 to 500 hours could be the only reason you will need when choosing Spartan as your next mower. The less time you spend changing oil, the more time you have to cut grass.

The Vanguard® EFI Oil Guard was developed to reduce downtime associated with engine oil maintenance requirements. Owners will benefit from a 60% oil maintenance cost savings per unit and season, virtually paying for itself. The Oil Guard System not only improves productivity, but ensures that the new 'TOOL-FREE' oil changes are cleaner, faster and easier. Vanguard® utilizes an easy-fill cap and integrated Vanguard Oil Guard Filter, which takes a short five seconds to replace.

ENHANCED XTF DECK SYSTEM

The new Enhanced Xtreme Turf Flow Deck System was designed with added suction to mow all types of grass. The rounded front baffling follows the contour of the blades. We've also added a wiper to help deflect the grass out to prevent it from circling back into the chamber.

The new deck is designed with a bent lip at the back that adds strength and prevents hang ups. It also includes Solid Anti-scalping Wheels with greased zerks. All Spartans are equipped with a commercial grade 7 gauge deck.

Pictured from Top Left to Bottom Right: Vibration Control Deck System Shock, XTF Wiper, Pulley Cover, Anti-Scalping Wheels

SRT

THE BEST OF THE BEST

All SRT commercial models are constructed with the 5-layered Smart Ride Technology for both increased traction and comfortable ride. They include "all out" Xtreme Duty (XD) commercial units, Heavy Duty (HD) commercial units, and Professional (Pro) units that provide SRT features at an unmatched price.

SRT-XD

PARKER HTG 16CC
Transmissions

BIGGEST - BADDEST - BEST

The biggest Vanguard® 896cc and 993cc, 135lb engines, along with the two 66lb Parker HTG-16cc extreme duty transmissions and the five layers of Smart Ride Technology comfort put the SRT-XD at the top of the food chain for COMMERCIAL quality mowers.

ENGINE	DECK SIZE	WEIGHT
Vanguard Big Block 896cc 28hp	54"	1,257lb
Vanguard Big Block 896cc 28hp	61"	1,281lb
Vanguard Big Block 993cc 36hp	61"	1,287lb
Vanguard Big Block 993cc 36hp	72"	1,326lb
Vanguard Big Block EFI 993cc 37hp	61"	1,290lb
Vanguard Big Block EFI 993cc 37hp	72"	1,331lb
Vanguard Big Block EFI 993cc w/ Oil Guard 37hp	61"	1,319lb
Vanguard Big Block EFI 993cc w/ Oil Guard 37hp	72"	1,343lb

* Shown with optional Front Suspension Forks

*All Spartan Mowers are equipped with multiple unique advantages. These are just a few available on this mower. See pages 5-8 to learn more.

ALUMINUM REAR WHEELS

Not only do they look upscale and sleek, they are also stronger than steel.

14" REAR RADIAL TIRE

This premier turf tire comes standard on the 61" and 72" deck for commercial and heavy residential mowing. The smooth-rolling tread design provides grip with less turf damage.

STRESS PADS

For those of you who mow hours at a time, try our stress pads out for yourself. Your shoulder and neck will thank you! Did we mention we don't compromise on comfort?!

ADJUSTABLE SEAT DIAL

We don't compromise on comfort. The 360° Floating Seat System, combined with the independent rear suspension will literally have you feeling like you are floating on air.

BROAD BEAM LED LIGHTS

Mounted directly to the front of the mower, it's great for finishing your last three rows at dusk and lighting your way into your trailer or shed.

INDEPENDANT ADJUSTABLE FRONT WHEEL ASSEMBLIES

Each front wheel has the option to be equipped with two adjustable shocks for superior ride and comfort.

Brake/Tail Light	Standard

AMERICA'S NEWEST CROSSOVER

We've combined the smooth ride of a high end golf cart with the rugged durability of a UTV to create the eNVy. This ultra quiet, brushless A/C electric Neighborhood Vehicle will get some major attention whether you're spending time with your family or putting it to work. Storage, seating options, 7" touch screen and power steering will have you saying YES to America's newest crossover!

8.7 ACRES UNDER ROOF OF STREAMLINED MANUFACTURING

"With our new production facility, we're able to offer a better product at a better price. The building has helped us tremendously, but nothing like our people have."

ROBERT FOSTER
